Swiss German (Basic)

Experience

August 2022 - Present

Full Stack Developer

Panter AG (Zurich, Switzerland)

Work in a high pace agile team, German and English work environment.

develop and maintain existing features and projects for inner use as well as for different clients.

Stack: Google Cloud, Docker, PostgreSQL, GraphQL, Express, Apollo, Prisma, Pothos, Next.js

May 2022 - August 2022

Frontend Developer

Tata Consultancy Services (Zurich, Switzerland)

Develop UI for Credit-Suisse.

Stack: React

January 2022 - April 2022

Full Stack Internship

Softwaremanufaktur.ch GmbH (Luzern, Switzerland)

Building the new version of the company main product, Axendo, using agile development methodology.

interesting for me is working in an intense work load mostly in German.

Stack: Angular, C#

March 2021 - October 2021

Full-stack

DEVPOST climate hackathon project (Luzern, Switzerland)

Together with 5 data scientists, we create a deep learning AI-model to analyze land areas using infrared & radar data to classify the land productivity over time.

Interesting for me was to collaborate with such a team and working with intricate GIS aspects.

Stack: React, Django, Docker, Nginx, Digitalocean.

Live demo : <https://landpro.ch/>

Code: https://github.com/odedindi/landpro_landing

March 2021 - April 2021

Frontend

Prototype for Axpo Switzerland (Zurich, Switzerland)

Final Boot camp project: Input, calculating, and visualizing data for ground measurements of utility poles.

Team of 5, 2 on the backend and 3 on the frontend.

Interesting for me was the challenge of meeting Axpo's needs and demands, and work with data visualization.

Stack: React, Django, Docker.
